

Duress™ Falcon.

The right amount of everything.

Live streaming video. Real-time location. Discrete activation. Fall detection.
Periodic check-ins. Incredible battery life.

Send internal alerts to your team and external alerts to our A1 Graded 24/7 monitoring centre. Falcon will transform your team's safety and can be deployed in less than an hour. It's all easier than you think.

Are you OK?

Set automatic check-ins for your entire team, which not only keeps your staff safe, it makes them feel safer as well.

Welfare Timer

Falcon allows your team to set a welfare timer in less than a second. Simply tap and drag the purple icon on the screen. After counting down, it will send an alert to our monitoring centre.

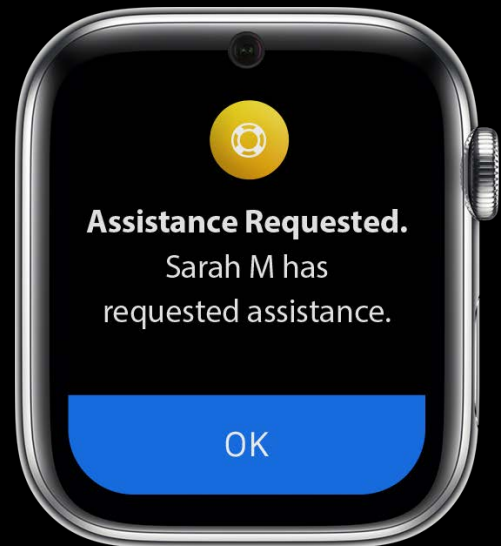

Fall Detection

Falcon is constantly analysing movement to detect a slip, trip or fall. If detected, the Falcon will ask the user to confirm if they are safe, before escalating to our monitoring centre.

Team Alert

Tap Falcon twice to notify your team, and they will receive a notification advising that you need help. No operators, no emergency services, just a quick way to request assistance.

Heart Rate Monitoring

Get notified when your heart rate has decreased or increased by 20%. When detected, Falcon will connect the user to the Duress Operations Centre as well as notifying pre-selected contacts.

Stay in Touch

Voice calls on the Falcon let you talk with staff from any phone, to clarify internal alerts or just to chat. Every voice call is encrypted to protect your privacy.

Emergency Activation

Tap your Falcon three times to stream live video and audio, location and profile data to the Duress Monitoring Centre, where your footage is carefully reviewed to quickly determine the safest emergency response.

Be Notified

Set up SMS contacts to receive updates of all emergencies in real time.

Wear it your way

Not a fan of watches?
Wear your Falcon with our Lanyard attachment for just \$49*

You're in good company.

Duress™ Dock.

Help your team take flight.

Duress Falcon Dock + Tablet

All your Falcons and users in one place.

Easily charge up to eight Falcons at once. Share Falcons by tapping your name on the Tablet to sign in. Place your Falcon back on the dock to sign out. This way you'll always know who is using Falcon.

Deploying Falcon is easy.

Your users. Your admins. You're good.

Our onboarding team securely onboards the stuff you care about — emergency contacts, users, teams, escalations and more to your Duress portal. We onboard everything in just a few steps, and notify you when you are ready to go.

Australian Support Centre

Whether you want to know more about deploying, get a hand setting up your Falcons, or ask us questions, we've got real people ready to help. You or your team can call a specialist, chat online, or visit us in person at our support centre.

Training

Our in-person and online training lets you get your team comfortable before, during and after deployment, allowing everyone to ask questions, activate emergencies, talk to operators and more.

Unlimited Solutions

Can't wear a watch? Falcon can be worn as a lanyard. Need to share Falcons between users? We have a Falcon sharing station. Need to connect Falcon to Wifi, use single sign on, or upload safety reports monthly? Yes, yes and yes.

Enter the Portal

Falcon is part of the Duress family, so it's easily managed via the Duress portal. The portal is your home for managing your users, reviewing any incidents, accessing reports, and more. Oh, did we mention it's really easy to use?
